SKILLS

- AWS, AZURE
- AWS (EC2, Lambda, VPC, Route 53, ECS, ECR, S3, IAM)
- IaC: Terraform
- Docker, Kubernetes
- Git, GitHub Actions, Jenkins
- Node.js, Express.js, React.js, MongoDB
- JavaScript
- Python

CERTIFICATIONS

AWS CERTIFIED SOLUTIONS ARCHITECT - ASSOCIATE

- Credential ID: 25e5ed46fb04484db85bd684fddb644
- https://aws.amazon.com/verification

EDUCATION

GURU JAMBHESHWAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

- Bachelor of Technology in Computer Science and Engineering
2022-2026

LANGUAGES

- English (Professional / Fluent)
- Hindi (Native)

PROFILE SUMMARY

AWS Certified Solutions Architect and Cloud/DevOps Engineer. Experienced in Infrastructure as Code (IaC) using Terraform and container management with Kubernetes. Skilled in automating CI/CD pipelines for full-stack applications to design highly available, scalable, and cost-effective cloud architectures.

PROFESSIONAL EXPERIENCE

Cloud Infrastructure Consultant (Freelance) | nirotechs.com | OCT 2025 - Present

- Deployed a highly available full-stack platform Taaj Food on AWS EC2 using Nginx, PM2, and secure HTTPS/SSL.
- Built real-time UI and scalable APIs with React.js, Node.js, Socket.io, and MongoDB Atlas.
- Managed end-to-end DNS configurations and integrated Razorpay, Firebase OTP, and Cloudinary APIs. (Live) https://taajfood.nirotechs.com/

TECHNICAL PROJECTS

1. Top10News - Full-Stack News Aggregator

- Developed a highly available, containerized full-stack news aggregator using React.js and Node.js.
- Automated cloud infrastructure on AWS (EC2, ECR) using Terraform (IaC) and Docker.
- Implemented CI/CD pipelines via GitHub Actions for seamless production deployment, which reduced deployment time by 40%.
- (LIVE) : https://top10news.jhoja.tech/

2. CompressedME - Serverless Optimization Pipeline

- Engineered a cost-optimized, serverless file compression application using AWS API Gateway and AWS Lambda.
- Automated secure infrastructure deployment across multiple AWS regions using Terraform and GitHub Actions.
- Reducing infrastructure costs by 50%.
- Built a responsive frontend with React.js and developed robust backend processing via Python.
- (LIVE) : https://compressedme.jhoja.tech/

3. Voting-App-K8s - Cloud-Native Architecture

- Deployed a production-grade application on AWS EKS to demonstrate complete GitOps and DevSecOps lifecycles.
- Orchestrated microservices using Docker and Kubernetes, with automated deployments via ArgoCD.
- Integrated Trivy for security scanning and set up observability using Prometheus and Grafana.
